## Projects

See my website for a comprehensive overview of my current and past projects, writings and interests.

### Bachelor thesis

'Des origines controversées de la comparaison internationale du coût de la vie pendant l'entre-deux-guerres. le Bureau International du Travail et l'enquête Ford-Filene'

Supervised by professor Marine Dhermy-Mairal

### Master thesis

'The Political Economy of Institutional Change and Social Blocs in Switzerland: a Neorealist Approach'

Supervised by professor Bruno Amable

## Interests

### Macroeconomics

I am interested in post-Keynesian macroeconomics, the identification of demand regimes and in the relationships between distribution and growth. I am also familiar with new-Keynesian economics.
